

We were appointed to take responsibility for researching and now implementing a stewardship and legacy strategy for the seven major parks, lakes, and numerous community facilities across the Garden City, whilst also looking into how to work with and through the numerous Management Companies set up by the developers.

From March 2021, we prepared and moved forward the implementation plan, set up Ebbsfleet Garden City Trust and organisation structure, appointed and service the trustees, and are now actively working on the transfer of the first community assets, the allotments and community gardens, sports centre, and community hall.
